

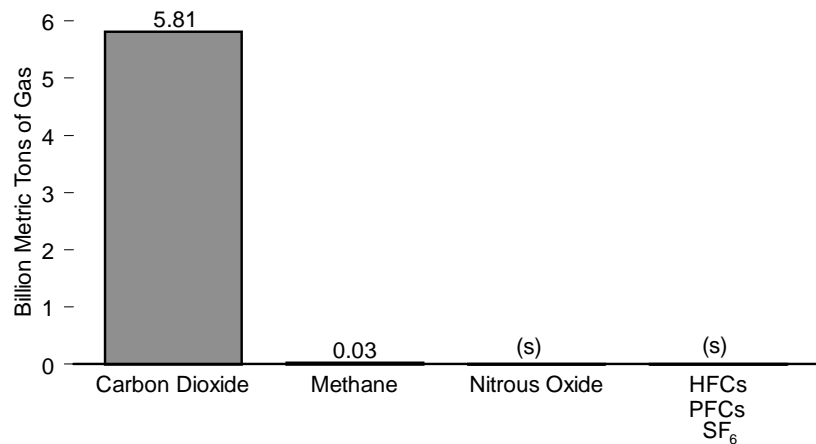

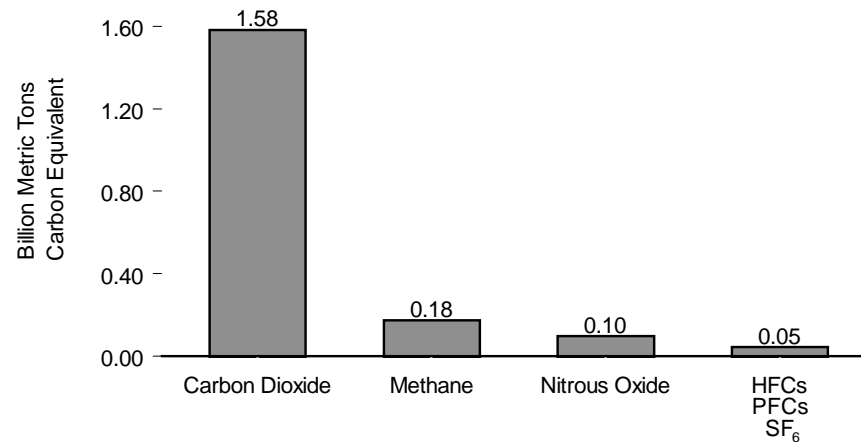

Figure 12.1 Estimated Emissions of Greenhouse Gases

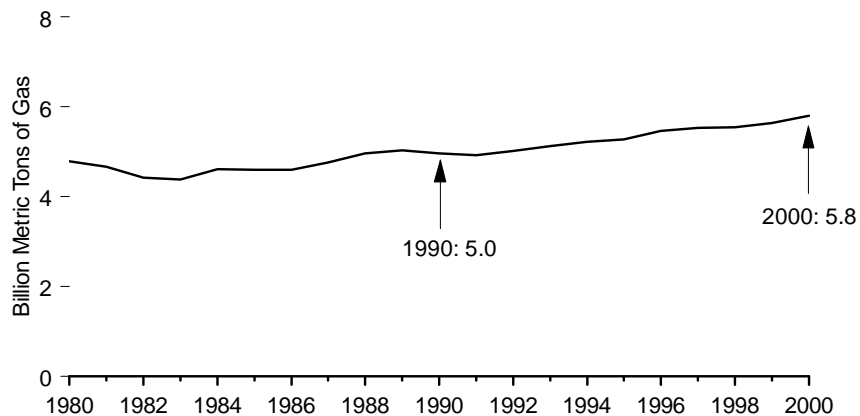

Emissions by Type of Gas, 2000

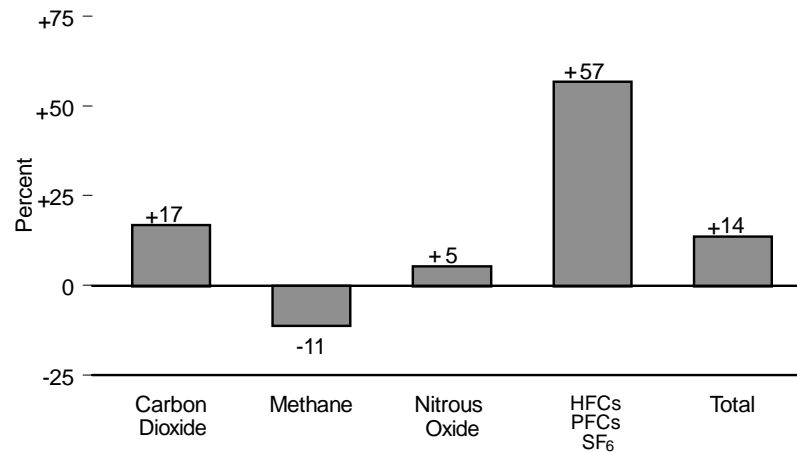

Emissions, Based on Global Warming Potential, by Type of Gas, 2000

Carbon Dioxide Emissions, 1980-2000

Change 1990-2000 in Emissions Based on Global Warming Potential

(s)=Less than 0.005 billion metric tons of gas.

Notes: • HFCs=hydrofluorocarbons; PFCs=perfluorocarbons; and SF₆=sulfur hexafluoride. • Because vertical scales differ, graphs should not be compared.
